

# An Introduction to **Server Making Assets Pack** by Aeno

'**Server Making Assets Pack**' is a collection of editable headers, editable server icons, emoji, and other useful resources. This collection of assets has been designed for passionate server makers who are looking to visually enhance their server. Users may use assets within for the benefit of improving their server. Please refer to [Disclaimer.pdf](#) or [Disclaimer \(Image Version\).png](#) for more information regarding how this resource may and may not be used.

Templates for headers and server icons are designed to be edited in Photoshop. The templates require you to be able to open and edit **.PSD** files. Should you not be able to edit these templates, there are premade server icons that you may use. These can be found under **Server Icons** ▶ **Premade Letters**

**Thank you for downloading!**
