

Guide to emojis ► “Dividers”

Perfect for separating topics in information channels

No one likes reading a boring, ugly wall of text. When you have to clearly separate information, dividers can break up the message in a simple yet attractive way. The dividers provided come in multiple colors, so get unique and creative!

Using Dividers Correctly

To get a seamless line while using dividers, make sure they stick together. All you need to do is make sure there are no spaces between each use of the emoji. Alternatively, you can include spaces if you prefer the look! Take a look at the picture on the right to see how wide the emojis actually are. That’s right, they’re very small. In sequence, however, they form to make a clean line that can stretch as far as you wish to make it, whether that be just a small divider or across the whole message.
