

Recommended fonts

For creating logos, headers, and other artwork

Finding the right font for your server's artwork can be a difficult task. There are countless fonts on the internet, and narrowing down to the best is not easy. That is why people often ask me what fonts I like to use in my designs. I've often been asked what fonts I've used in my headers. Finding the best fonts is easier when you've had years of experience playing around with designs and typography! This document consists of a list of my favorite fonts that I have used over the past several years.

Here is a collection of fonts that I often use, or have used in the past.
For legal reasons, I cannot provide downloads to these fonts.

CUNIA

Creato Display

BEBAS NEUE

ΛZONIX

Nautilus Pompilius

Alice

Basement Grotesque

PLATEIA
